**Supporting services &
Training**

EMBRC Belgium serves as the Belgian node of the European Marine Biological Resource Centre (EMBRC), a pan-European research infrastructure comprising a network of marine stations and research institutions across Europe. EMBRC Belgium supports marine scientists and Blue Economy professionals by offering advanced training, state-of-the-art marine research services, ecosystem access, culture collections, and integrated omics platforms. These services are provided through 10 research groups distributed across 3 universities and 2 research institutes.
